

Migratory Spring Fishing Seminar

Start Date: 3/13/2018 6:30 PM

End Date: 3/13/2018 8:30 PM

Every Spring, thousands of fish migrate from our coastal rivers and sounds into many rivers in the State. The Roanoke River Striper and Shad migration is the most impressive of all in terms of sheer numbers of fish. In this seminar by local guide Captain Greg Griffin, learn more about these fish, where they will be, when they will be there and how to catch them. The tactics you will learn here will also work in the other river systems around NC. Join us here at the Pechmann Fishing Education Center to learn from a weather vet & kick your spring off right.
